Variable Annuity Performance ^{1, 2, 3, 4}

December 2018

The performance data below represents past performance. Past performance is not a guarantee of future results. Standardized Performance for a funding option, as defined by the SEC, is the Average Annual Total Return for periods commencing on the investment division inception date, one, five or ten years ago, and terminating at the end of the most recent calendar quarter. The Investment Division Inception date is the date the portfolio was first offered under the separate account that funds the product. The SEC requires that standardized performance figures be updated no more frequently than each calendar quarter. Investment return and principal value of an investment will fluctuate so that an investment, when redeemed, may be worth more or less than its original value. Current performance may be higher or lower than the performance data quoted. Performance current to the most recent month-end is available upon request by calling 1-866-438-6477.

Variable Annuity

1. A Portfolio may have a name and/or objective that is very similar to that of a publicly available mutual fund managed by the same money manager. These Portfolios are not publicly available, and will not have the same performance as those publicly available mutual funds. Different performance will result from differences in implementation of investment policies, cash flows, fees, and size of the Portfolio. The expenses of some of the Portfolios may have been subsidized for a portion of their operating history. Any such subsidies have the effect of increasing their performance results.
2. Waiver and/or reimbursement of investment management fees and certain fund expenses may have taken place for each of the portfolios in the past. Such waivers and/or reimbursements have the effect of increasing performance results.
3. The performance shown may reflect, for some time periods described, the management of previous sub-advisers.
4. Certain Class B Portfolios of the Met Investors Series Trust and the Portfolios of American Funds have adopted a distribution plan under Rule 12b-1 of the Investment Act of 1940. We are paid the Rule 12b-1 fee.

Asset allocation portfolios are "fund of funds" portfolios. Because of this two-tier structure, each asset allocation portfolio bears its own investment management fee and expenses as well as its pro rata share of the management fee and expenses of the underlying portfolios. The participant may be able to realize lower aggregate expenses by investing directly in the underlying portfolios instead of investing in an asset allocation portfolio. In that case, you would not receive the asset allocation services of MetLife Advisers, LLC.

Exchange Traded Funds (ETF) purchases and sales are made on the open market and as such are subject to ordinary commission charges by the Broker/Dealer firm who executes the transaction. Trading throughout the day, the value of an ETF may be more or less than the net asset value of the underlying holdings. Additionally, the spread between the bid and ask prices will cause the price at which you can immediately sell an ETF share you just purchased to be lower than the price you paid for it. There is no guarantee that an ETF will meet the objectives of its underlying portfolio.

While diversification through an asset allocation strategy is a useful technique that can help to manage overall portfolio risk and volatility, there is no certainty or assurance that a diversified portfolio will enhance overall return or outperform one that is not diversified. An investment made according to one of these asset allocation models neither guarantees a profit nor prevents the possibility of loss.

MetLife Advisers, LLC is the investment adviser to the asset allocation portfolios. MetLife Advisers, LLC. (for the American Funds and MetLife Asset Allocation Portfolios) and SSgA Funds Management, Inc. (for the SSgA ETF portfolios) choose the underlying funding options for each portfolio and the proportions of each underlying funding option allocated to each portfolio. To ensure optimal diversification and an appropriate balance of risk and reward, MetLife Advisers, LLC (for the American Funds and MetLife Asset Allocation portfolios) and SSgA Funds Management, Inc. (for the SSgA ETF portfolios) review the portfolios on a consistent basis and may make adjustments to the underlying funding option selection or allocations.
